

Year 1, n°1

JANUARY 2009

SUPER-F FRAGRANCE INC.

NEWSLETTER

Super-F Fragrance Inc.

*Wishes you a happy, healthy
and prosperous New Year 2009.*

*We hope that we will have a long mutual business
relationship and many years ahead together to resolve
international industrial odours problems.*

Congratulation !!!

We are pleased to announce that our President, Mme Caroline Arsenault, has participated to a contest which was aiming to highlight entrepreneurs who runs companies that stand out in their specific markets.

contest and Super-F Fragrance has been chosen to be one of the 10 finalists. The jury of the contest has discerned that our Technology has a great potential at a time where the environment matters are a priority for all.

www.voirgrand.tv.

We will keep you inform about the conclusion of the contest.

Beyond 550 companies have participated to this

We invite you to visit the contest's web site at:

As we have promised at the end of year 2008, we are in the process to produce promotional materials that will help you commercialize our products in your territory.

Summary :

- *Congratulation !!!*
- *odours generated by Recycled Solvent*
- *odours emitted by sludge from a Beer Brewer*
- *Odours emitted by the stacks of a Tires manufacturing plant*

***A better environment for everyone!
Expert in solving industrial odours!***

Meanwhile, we are sending you some successful stories at use of our products.

We feel that these applications can bring you to investigate the possibilities to approach similar manufacture or process in your territory.

Neutralizing odours generated by Recycled Solvent

One of the major well-known company internationally involve in all environmental matters, **recycle solvent** to resell to customer.

They were confronting to problematic odorous situations with some different types of solvent that they recycle.

They have then contacted us to assist them to resolve their delicate conditions since they had complaints from customers.

We have recommended the use

of our **SF96-C107** formula and they have conducted trials in their day to day process.

They have reached a neutral point using our **SF96-C107** directly into their recycle solvents at a rate of 1: 4000.

They are actually purchasing **SF96-C107** on a regular basis for different plants which have the same process in Quebec.

SF96-C107 have showed very good results to neutralize asphalts and quenching oil.

Neutralizing odours emitted by sludge from a Beer Brewer

A large **beer manufacturing plant** was having complaints, from neighbours and from city authorities, on regard of malodorous emitted around plant perimeter.

The odorous emission were caused by the sludge produce at their waste water treatment plant.

They have got in touch with

Super-F to resolve their odorous situation.

We have then recommended the use of our **SFA Plus-888nf** formula to neutralize odours of sludge from pond.

They are truly impressed with the results. They are now using **SFA Plus-888nf** in a regular basis.

At use, **SFA Plus-888nf** is diluted with clean water at a rate of 1:2000.

The efficient rate of application employ is 1 litre of made up solution per cubic meter (m³).

Neutralizing Odours emitted by the stacks of a Tires manufacturing plant

We have been contacted by an environmental consulting engineers company which was mandated by an international **tires manufacturing company** to help them to cure a rubber odours emissions problems.

So, this consulting firm contacted us since they were looking for different technologies to control the odours emitted at the tires manufacture.

Our product was then in contest with competitive products and technologies.

Site trials were subsequently made will all alternatives to

treat their rubber malodorous emissions.

Those trials have conclude that our products were the most excellent to neutralize emitted odours.

The results confirmed the ability of our product to neutralize odours and not only mask them since we have their reached a neutral point without any residual odours.

Our **SFA Plus-HPS** is use diluted with clean water at a rate of 1:500.

Made up solution is vaporized into the chimneys via pressured

air nuzzles installed at counter current of the air.

The superintendent of this tire's manufacturing plant as recently inform us about their intention to establish a plan to use our products to neutralize odours emitted by different step of their process such as: waste water, sludge and solids residues. They also intend to control all application of our products via their control board.

- ⇒ We encourage you to provide us with case studies so that we can share several applications, comments or any specifics demands that will discuss with great interest.
- ⇒ We anticipate the new tools will assist you to promote, improve and propose products to conclude management and development of mutual business relationship.
