## Successful application into Slaughterhouses industry

---

A slaughterhouse industry well known nation wide has contacted us to resolve their odours emissions problems observed at their chimneys and surrounding areas. They slaughter around 6500 pigs per day. The company was receiving complaints from neighbours and environment authorities.

Our technical team went to visit their process to perceive the smell and conduct site trials. At the top of the roof of the industry, there are six (6) air exhausts. We use our **SFA Plus-HPS** diluted with clean water at a rate of 1:400. The made up solution is atomize via a nozzle installed in each chimneys. They daily consumption is 230 litres of solution. We have once again achieved a complete odours neutralisation.

The same customer makes use of a patented cabinet unit designed to treat fugitive malodorous emissions. A competitive product they were using in their unit was not efficient at all. We have then conceived a brand new ready-to-use formula: **Vapo Scent-33**. The principle of the method of application is that our **Vapo Scent-33** is poured into a small open container into the unit itself. A blower carries the vapour of the formula threw perforate piping that is installed around perimeter of a problematic lagoon.

Since they are using our formula into their unit, there are no perceivable odours anymore.

## Natural Odor Control

Owner : **Mr David Morey**

Tel.: 618 9274 1066, Cell.: +61 458 008 011

Fax : 618 9274 1096

E-mail : [david.morey@naturalodourcontrol.com.au](mailto:david.morey@naturalodourcontrol.com.au)

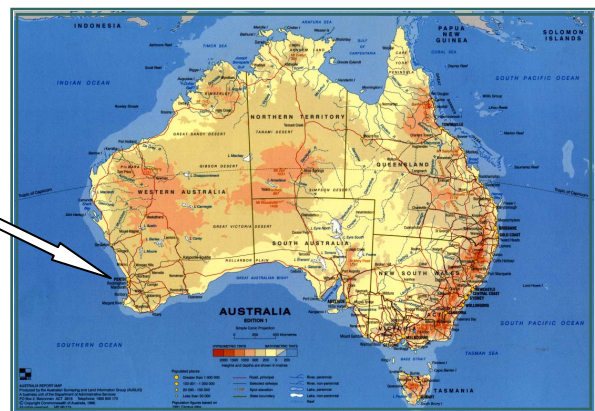

Although **Natural Odour Control (NOC)** was registered in November 2007 it did not start operating until March 2009 due to legal issues surrounding the estate of the previous owner.

Since then NOC has started to develop markets in the Poultry, Wastewater, House hold waste, borewater and the domestic market with ... *Super-F products*.

**Natural Odour Control is based in Perth Western Australia.**

**We are here**

On the 6<sup>th</sup> of July 2009, Australia's population was 21,836,235 people with Western Australia being home to almost exactly 10% at 2,170,000 people.

Shown above are Damian – Warehouse/product Supervisor, Jeannette – Office Administrator, David Morey Owner/business development, Shane Matthews Owner/engineering.

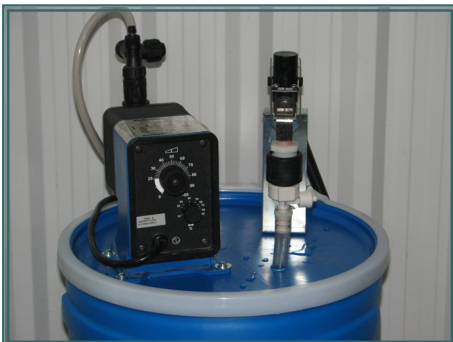

# Poultry Processing Plant Exhausting

NOC recently won a contract to provide odour neutralisation of exhaust gases from a poultry processing plant exhausting 1044m<sup>3</sup>/hr.

***SFA Plus- HPS*** is diluted with water at a ratio of 1 : 14 000 which is atomised directly into the chimney stacks.

One litre of concentrate treats approximately 50,000 m<sup>3</sup> of exhaust gases. Since implementation of Super-F complaints by neighbours have been eliminated and the customer has realised a 40% saving on the chemicals they were previously using.

Example of a simple system for dilution and application that we conceived.

Founder of Super-F Fragrance Inc.  
Mr. Paul Arsenault
